- Please sign in at the timers' desk (next to the computer desk at the scoreboard pool) as soon as you arrive. You will choose your lane at that time (first come, first choice.)
- Please be on deck by the timer's desk 30-45 minutes before the meet begins for a timers' meeting. You must attend the timers' meeting even if you have timed 10,000 times before.
- Please plan to go directly from the timers meeting to your assignment, not detouring for coffee, to talk to your kids, etc. We try to start on time.
- Please do not use cell phones while timing. Please silence your cell phones. Ringing and vibrating cell phones have caused swimmers to false start in the past.
- There will be one BAC timer and one non-BAC timer in each lane. We ask that the BAC timer operate the plunger and the non-BAC timer do the writing. We have found that having the same person use the plunger the whole session leads to more consistent results.
- The BAC timers will time the whole session, including the 1000's and 1650's. The non-BAC timers do not have to time the 1000's and 1650's. They do have to time the 500's. Swimmers must provide their own (second) timer for the 1000's and 1650's.
- Back-up timers will be available in case you need to use the restroom.
